CLOUD COMPUTING

Lift and Shift your Application - Save Time and Money

Special Publication 800-145

NIST

National Institute of Standards and Technology
U.S. Department of Commerce

**The NIST Definition of Cloud Computing**

TNH

What is Cloud Computing ?

Simply put, cloud computing is the delivery of computing services—including servers, storage, databases, networking, software, analytics, and intelligence—over the Internet ("the cloud") to offer faster innovation, flexible resources, and economies of scale. You typically pay only for cloud services you use, helping you lower your operating costs, run your infrastructure more efficiently, and scale as your business needs change. **Azure**
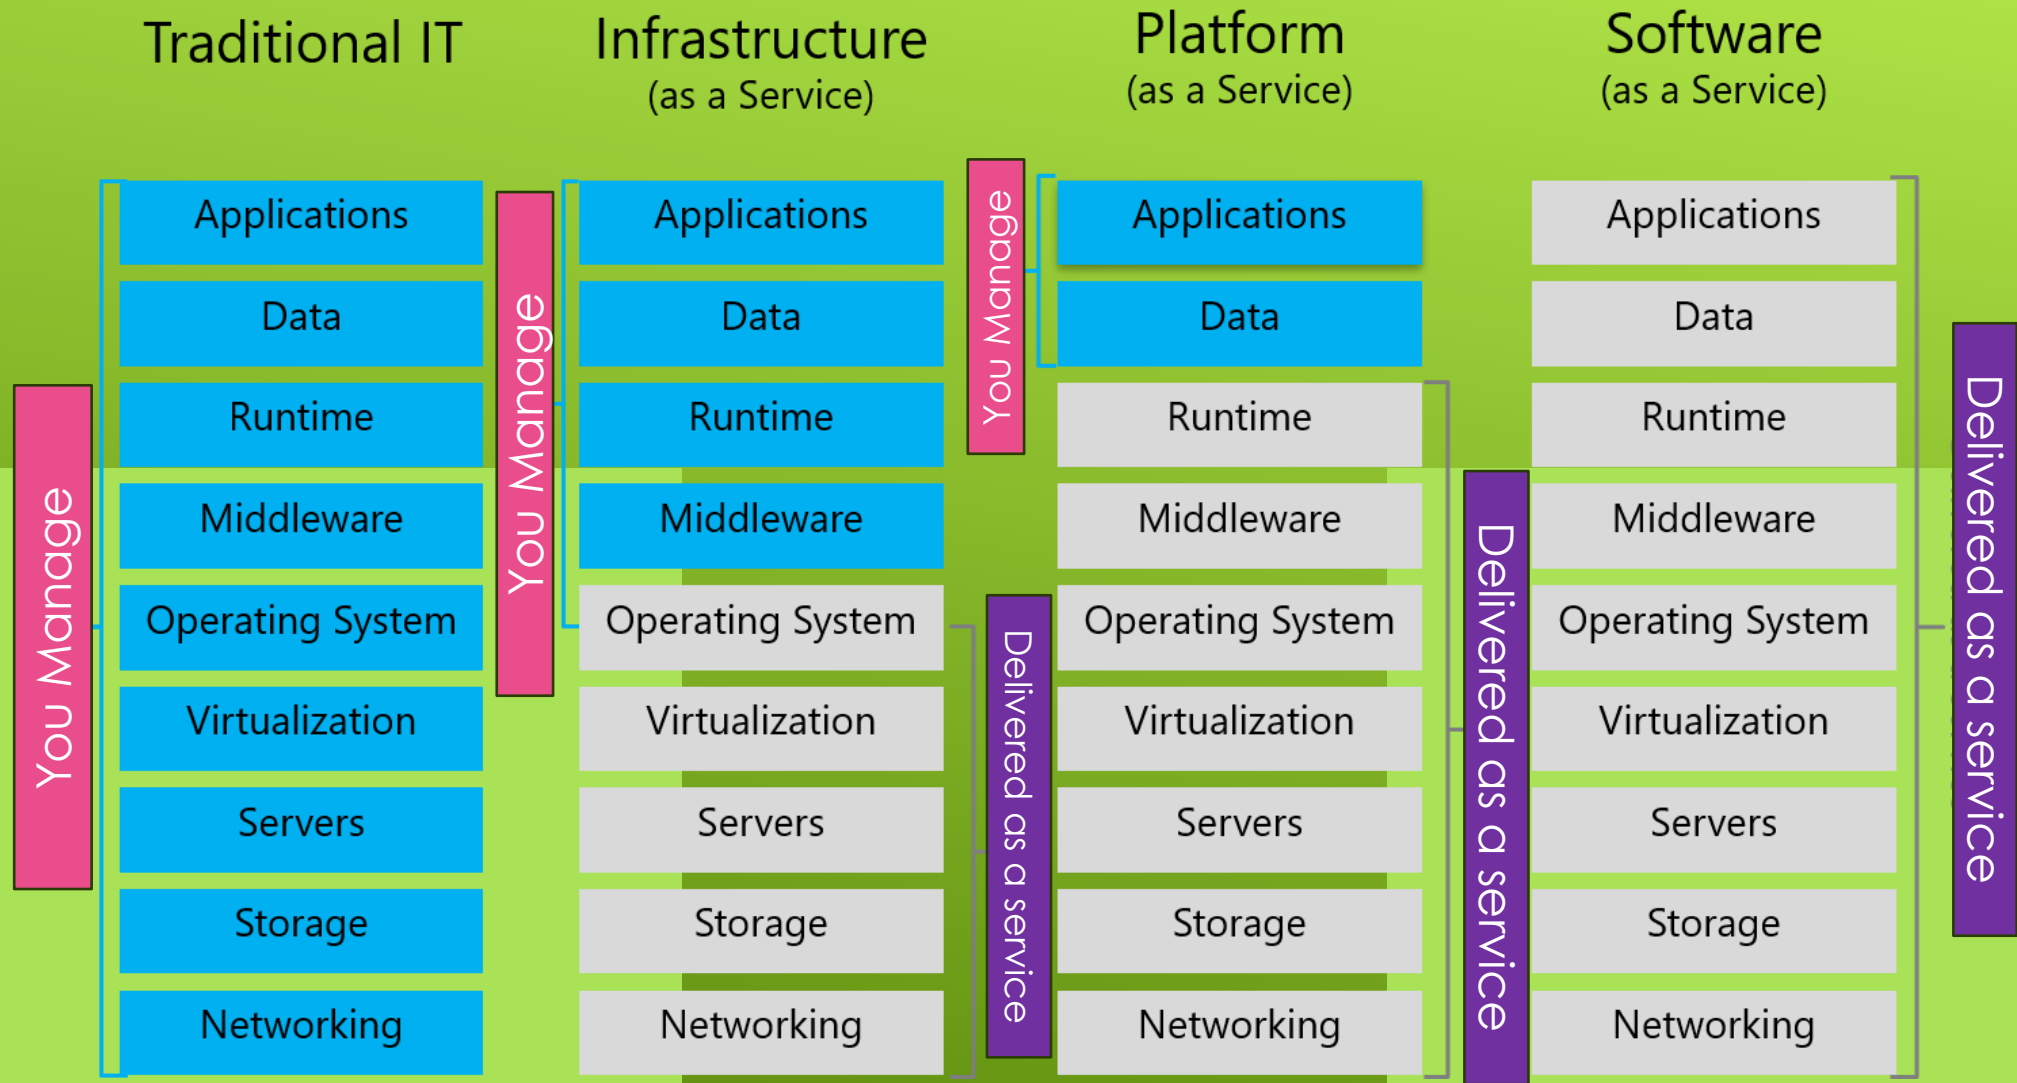

Deployment Models

What is Cloud Computing ?

Service Models

Traditional IT	Infrastructure (as a Service)	Platform (as a Service)	Software (as a Service)
Applications	Applications	Applications	Applications
Data	Data	Data	Data
Runtime	Runtime	Runtime	Runtime
Middleware	Middleware	Middleware	Middleware
Operating System	Operating System	Operating System	Operating System
Virtualization	Virtualization	Virtualization	Virtualization
Servers	Servers	Servers	Servers
Storage	Storage	Storage	Storage
Networking	Networking	Networking	Networking

Traditional IT: You Manage (all)

Infrastructure (as a Service): You Manage — Applications, Data, Runtime, Middleware; Delivered as a service — Operating System, Virtualization, Servers, Storage, Networking

Platform (as a Service): You Manage — Applications, Data; Delivered as a service — Runtime, Middleware, Operating System, Virtualization, Servers, Storage, Networking

Software (as a Service): Delivered as a service (all)

Serverless computing
Overlapping with PaaS, serverless computing focuses on building app functionality Based on Event driven Architecture only using the resource when the required function triggers. The cloud provider handles the setup, capacity planning, and server management for you.

DLP

TNH

The Few Negatives

- ❑ Depends on internet connection
- ❑ Risk of data confidentiality
- ❑ The level of security
- ❑ Compliance
- ❑ Vulnerable in the event of an attack
- ❑ Vendor Lock-in
- ❑ Support Issues
- ❑ Account or service Hijacking
- ❑ Data loss or Theft
- ❑ Data Leakage
- ❑ Insecure Interfaces and APIs

But Moving to Cloud may be inevitable !!

Top Cloud Technologies 2021

Edge

This architecture involves positioning processors, data storage, and servers as close as possible to the users who need them the most. Further it is extended to the network functionality, resulting in minimal latency, easier maintenance, and a smaller carbon footprint.

SASE

Secure Access Service Edge (pronounced "sassy") is a network architecture that improves remote access by combining software-defined wide area network (SD-WAN) functions with cloud-native network security assets. These assets include secure web gateways, firewalls as a service, zero-trust network access, and cloud access security brokers. WFH is pushing SASE.

Serverless

Often referred to as Function as a Service (FaaS) or Event Driven, serverless computing lets developers write and deploy code without concerning themselves with provisioning cloud resources. Infrastructure is provided through automation.

Orchestration

More the number of interconnected services more the autoscaling required. With the high demanding nature of quality deliverables, the orchestrations platform has big role to play in terms of managing large number of services.

TNH

Top Cloud Technologies 2021

Multicloud

Due to competitiveness and heavy demand between services offered by different cloud provides , it has caused bridging between providers benefiting the small providers as well.

Cloud Migration with Data Privacy

As the WEH workload went high due to the pandemic the privacy of data when moving to cloud also became very important. The technologies involving Encryption and consumer privacy will be in demand.

TNH

Cloud Computing Example which will bring the world at our fingertips

ATLASSIAN

Projection @ Industry: The company's line of products include many of the most widely used SaaS platforms across industries, including Jira, Confluence, Bitbucket, Trello and OpsGenie.

ZOOM

Projection @ Industry : It is all about Virtual meetings. Uber, Workday , Service Now and Ticketmaster all use Zoom to boost collaboration between teams and store meetings for future reference.

Microsoft Office 365

cloud-based Microsoft Office 365 dramatically expands the Office suite's parameters. Users now may create, edit and share content from wide range of devices including PC, Mac, iOS, Android or Windows device in real-time, connect with colleagues and customers across a range of tools from email to video conferencing and leverage a range of collaborative technologies supporting secure interactions both inside and outside of the organization.

Box		**Dropbox**	**HubSpot**	**Spotify**	**Orderhive**
Google Apps		**Google G Suite**	**Netflix**	**Splunk**	

TNH

Cloud Computing Example which will bring the world at our fingertips

PAAS

ACQUIA

Projection @ Industry : Johnson & Johnsons , Whole Foods, IBM, the BBC and Panasonic use Acquia's Cloud.

Heroku

Projection @ Industry : Heroku provides platform for very large list of well-known customers Thinkmd ,Yabota, Lyft, Soundcloud, Macy's, Charity: Water and Toyota.

Moved from AWS to Oracle Gen2 Cloud
Saved 80% on Network Egress Costs

TNH

Cloud Computing Trends in 2021

Edge Is the New Cloud

AI and ML Will Revolutionize Cloud Computing

Increased Demand For Private, Hybrid Cloud Multi-Cloud And Joint Cloud Provider Offerings

Rise of The Cloud Native Technologies

- ✓ **Containerization**
- ✓ **Going Serverless**
- ✓ **Orchestration Platforms**

The Growth Of SASE Adoption

Increased need for, Data security, privacy, and Regulations

Virtual Desktops May Be The Workplace of The Future - Google offers this through Chromebook devices.

Popular Cloud Computing Events and Conferences to Attend in 2021

Cloud Expo Europe 2021
Mission Possible
Host: Cloud Expo Europe
Date: July 7-8
Location: Excel, London, UK
From the organizer: *"The Cloud Public Sector Summit is an interactive 1-day event featuring a series of keynotes, presentations and panel sessions, addressing the key challenges and opportunities faced by senior technology professionals and business leaders in the public sector. The agenda features 10 sessions, providing a stack of opportunity for the audience to source information, ideas and inspiration to design, build and manage their technology architecture."*
REGISTER

IEEE International Conference on Cloud Computing 2021
A Prime International Forum for Both Researchers and Industry Practitioners
Host: IEEE
Date: September 5-10
Location: Virtual
From the organizer: *"The IEEE International Conference on Cloud Computing (CLOUD) has been a prime international forum for both researchers and industry practitioners to exchange the latest fundamental advances in the state of the art and practice of cloud computing, identify emerging research topics, and define the future of cloud computing. All topics regarding cloud computing align with the theme of CLOUD. In 2021, we will gather to strive to advance the largest international professional forum on cloud computing."*

TNH

Popular Cloud Computing Events and Conferences to Attend in 2021

Cyber Security and Cloud Congress 2021
Exploring the Security Needs of Future Technology
Host: Cyber Security Cloud Expo
Date: September 22-23
Location: Santa Clara, California, U.S.
From the organizer: *"The Cyber Security & Cloud Congress will cover two days of top-level content and thought leadership discussions looking at the Cyber Security & Cloud ecosystem. Don't miss the opportunity to explore this innovative technology and its impact on a range of industries including, manufacturing, transport, supply chain, government, legal sectors and financial services, energy, utilities, insurance, healthcare, retail, and more!"*

REGISTER

## Infrastructure Is Everywhere: Accelerating Business Value Through Innovation
Host: Gartner
Date: December 1-2
Location: Tokyo, Japan
From the organizer: *"Around the world, organizations and entire industries have been forced to regroup and reassess how they do business. Infrastructure and operations (I&O) leaders have had to change plans rapidly to adjust to remote workforces and cost pressures, and keep core systems operational and resilient. As business moves faster into new territory, IT leaders faced a critical mandate and opportunity: Adapt and innovate IT I&O to deliver competitive advantage in a world that is full of disruption."*

TNH
Popular Cloud Computing Events and Conferences to Attend in 2021

Microsoft Ignite
A digital world at your fingertips
Host: Microsoft
Date: March 2-4
Location: Virtual
From the organizer: *"The next Microsoft Ignite is March 2–4, 2021. As we enhance the experience, enjoy and share your favorite moments from September, 2020."*

CloudFest 2021
Building CloudFest Together
Host: CloudFest
Date: March 23-25
Location: Virtual
From the organizer: *"CloudFest returns on an all-digital platform amid a global pandemic as we take stock of the strengths, weaknesses, risks, and opportunities that are revealed by a globe-spanning threat like COVID-19. The internet has delivered when it was needed most, just as its architects predicted—now let's take it to the next level. You, the cloud professional, have an important role to play in the future of technology—so join us at CloudFest 2021 and let's build something great together."*

Cloud Transformation Champions, Online
Connecting Executives Leading their Enterprise Through a Cloud Transformation Journey
Host: Corinium Intelligence
Date: March 2-3
Location: Virtual
From the organizer: *"Join us wherever you are in the world. At home, in the office, on desktop, mobile or tablet for just 90 minutes a day starting 2nd March, 2021."*
